INTRODUCTION TO COMPUTER NETWORKS

ABOUT THIS COURSE

- Course name: Introduction To Computer Network
- Course code: **502046**
- Course credits: 4 (3.1)
- Lecture hours: 45
- Lab hours: 30
- Self learning hours: 120
- Prerequisites: 501043

COURSE DESCRIPTION

- Chapter 1: Computer Networks and the Internet
- Chapter 2 - Application Layer
- Chapter 3 - Transport Layer
- Chapter 4: The Network Layer: Data Plane
- Chapter 5: The Network Layer: Control Plane
- Chapter 6 - Link Layer and LANs
- Chapter 7: Security in Computer Networks

OBJECTIVES

- Understand the fundamentals of computer networking, including the OSI and TCP/IP models, network topologies, and protocols.
- Understanding the principles and concepts of computer networking, including network architecture, protocols, and services.
- Understanding the role of network applications and services, such as email, web, and file sharing.
- Configure and troubleshoot local area networks (LANs) and wide area networks (WANs) using common networking equipment and tools.
- This module is a prerequisite for familiarization with the analysis of the operation of computer networks, configuration and network traffic.

Student's tasks

- Being on-time and in your seat when class starts
- Staying until the end of class. Should students have to leave class early, please have the courtesy of letting the instructor know before the beginning of the period and leave quietly so as not to disturb the other members of the class.
- Being constructive to the learning environment. Mobilephones (both smart and inept) and other electronic devices need to be set to silent during class at all times.
- Being "present" in the class and focused on class material. The lectures will sometimes cover extra material (e.g., exercises, discussions) not contained in lecture notes. Students are responsible for everything covered or assigned in class. If students miss a class, it is entirely their responsibility to determine what they have missed including any administrative announcements lecturer may have made.
- Coming prepared to contribute to the class.
- Communication with the lecturer.
- Students have to attend at least 80% of class hours (if this regulation is not fulfilled, students are not eligible to take their final exam).

TEXT BOOKS

[1]. Kurose & Ross, [2021], Computer Networking: A top-down approach, 8th edition, Global Education, Pearson.

[2] Cisco Network Academy [2019], Introduction to Computer Network, version 7.0. https://www.netacad.com/

[3]. B. A. Forouzan, [2010], TCP/IP Protocol Suite, Mc Graw-Hill.

[4]. Andrew S. Tanenbaum, David J. Wetherall, [2011], Computer Networks, 5th Edition, Prentice Hall, Boston.

[5]. B. A. Forouzan, [2010], TCP/IP Protocol Suite, Mc Graw-Hill, NY.

ASSESSMENT

- Process evaluation 1: **10% (Process Exercise)**
- Process evaluation 2: **20% (Assignment, Practice test)**
- Mid-term test: **20% (Multiple choice question)**
- Final examination: **50% (Multiple choice question)**
